

LIMPOPO

PROVINCIAL GOVERNMENT
REPUBLIC OF SOUTH AFRICA

DEPARTMENT OF
TRANSPORT AND COMMUNITY SAFETY

TERMS OF REFERENCE FOR THE PROCUREMENT OF SERVICES OF A TECHNICAL TRANSACTION ADVISOR ON NEGOTIATED CONTRACTS.

1. Background and Context

The Limpopo Provincial government through the Department of Transport and Community Safety requires services of a technical transaction advisor to assist and guide the Department in the conclusion of new negotiated contracts. The primary goal of this endeavour is the consolidation and integration of twenty-six (26) subsidised public transport contracts into nine(9) subsidised contracts within the Province. The initiative is geared towards transforming the subsidy landscape by improving the efficiency, accessibility and overall quality of public transportation services while optimizing resource allocation. To accomplish this mission, an invitation is extended to seasoned and qualified specialists, companies or consortia in the field of public transport to submit bids for the services of a technical transaction advisor.

2. Scope of Work

The technical transaction advisor shall provide guidance to the Department of Transport and Community Safety on the following matters.

2.1. Establishment of Rationalised Operating Companies

The plan encompasses the establishment of nine fully independent bus operating companies or Special Purpose Vehicles (SPVs) across the

province's five districts. The Department of Transport and Community Safety has signed Intergovernmental Authorisation Agreements (IGAAs) with District Municipalities to conclude new contracts. In this capacity, the technical transaction advisor, assumes a pivotal role in providing essential guidance and support to the Department of Transport and Community Safety.

The technical advisory role encompasses several critical components. It entails the determination of shareholding structures for the companies to be determined, the definition of an appropriate number of directors, and the structuring of essential human resources requirements and arrangements. These measures are of utmost importance in ensuring the self-sustained operation of these companies while upholding compliance with the specified contractual boundaries and adhering to relevant legislative frameworks which include but not limited to the National Land Transport, 2009 (Act No, 5 of 2009), the Public Finance Management Act, No 29 of 1999 as amended and the Companies Act, 2008 (Act No, 71 of 2008)

The Technical Transaction Advisor (TTA) will further confirm the establishment of organisation and manpower structures, including qualifications and the necessary training and retraining. This will be done with due consideration of the existing physical infrastructure's characteristics and the requirement for multiple operating facilities in each specific case. Considering these matters, advice regarding the payment of retrenchment costs will also be extended and the provision for such costs as stipulated in existing contracts.

2.2. Route Rationalisation

To prevent service duplication, initiate an evaluation of the newly designed bus routes and services through-out the Province. Based on this assessment, craft a comprehensive route rationalisation strategy aimed at eliminating duplications, redundancies whilst promoting operational efficiencies and optimisation. Collaborating closely with current contracted

bus companies, put forward an optimised network of routes designed to maximize coverage and enhance service quality.

2.3. Service Integration

Provide guidance to the Department of Transport and Community Safety and other stakeholders regarding the creation of a standardized integrated fare structure and ticketing system. This will facilitate smooth transfers between diverse bus routes and operators. Simultaneously, ensure the deployment of a real time tracking and passenger information system to enhance convenience. Establishing transparent coordination mechanisms with other modes of transportation, including taxis, railways, is imperative.

2.4. Quality Assurance

The appointed Technical Transaction Advisor shall be expected to uphold adherence to service standards by establishing routine monitoring and robust quality control system. Effective mechanisms for collecting and addressing passenger feedback and complaints should be established. Guidance and directives regarding the implementation of safety protocols, encompassing driver training, vehicle maintenance, and emergency response procedures, must also be provided.

2.5. Bus Fleet Evaluation

Based on the specifications outlined in the negotiated contract, the TTA shall provide assessment of the current status of the existing operators' bus fleet. The assessment should include but not limited to evaluation of the fleet's condition, age, and compliance with environmental standards.

The TTA should formulate a comprehensive fleet modernization strategy based on the information gathered. This strategy should encompass the acquisition of new buses and the retrofitting of existing ones to align with mandated standards, with a specific focus on equipping all buses with safety and comfort features.

2.6. Financial Sustainability

The Transaction Advisor's responsibilities include the preparation of a comprehensive financial plan. This plan will encompass revenue forecast, strategies for effective cost management, and mechanisms for securing funding.

Exploration of potential opportunities in public-private partnerships is essential to boost revenue generation through avenues such as advertising, concessions, and non-fare box income sources.

Furthermore, it is imperative to develop a sustainable pricing model that not only ensures affordability for passengers, but it is also cost-effective and economically sound for the Department of Transport and Community Safety.

2.7 Reporting

TTA shall provide the Department with the Project Plan within seven(7) working days after appointment.

TTA shall provide the Department with monthly progress reports on the project.
